

Sr. Scientist

R&D | Santa Ana | CA

Job Function:

We are hiring for a Sr. Scientist. The Sr. Scientist will be responsible for activities relating to cell biology, product development, technical product support, and process improvements.

Job Duties:

- Conceptualize, develop and execute experimental strategy and plans required for the development of new products or technologies to support the cell culture market
- Supervise and conduct experimental work related to new product development
- Supervise a team of R&D scientists
- Support marketing and new products through presentations, publications, collaborative studies, interactions with key customers and as a participant in conferences
- Contribute to development of long-range plans for R&D
- Learn, maintain and advance expertise in areas relevant to company's products and strategic goals

Experience/Education:

- PhD in Life Science, Biochemistry, Cell Biology, or related science
- Minimum five years' of relevant experience, with emphasis in experimental design, execution and completion of projects related to cell culture products
- Solid understanding and knowledge of media formulation chemistry is required
- Solid understanding of metabolomics is required
- Strong oral and written communication skills
