

Cancer is evolving, your media should too

Introducing CHANG Marrow™

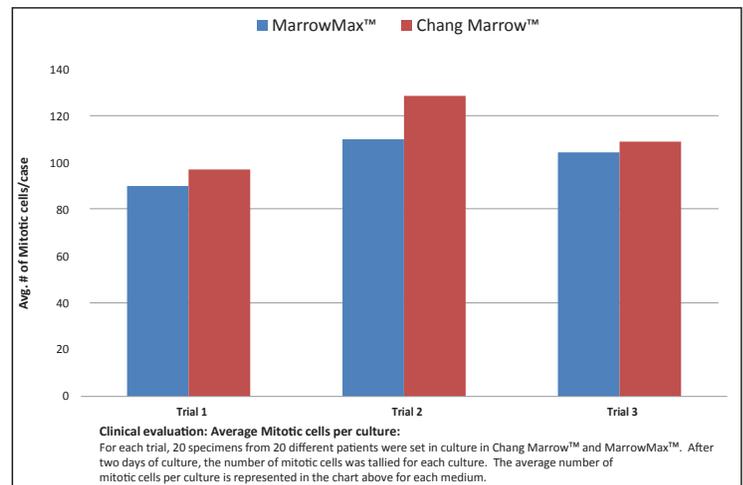

NEW!

- Greater percentage of abnormalities
- Higher mitotic index
- Superior chromosomal morphology

CHANG Marrow™ is a complete, ready-to-use medium optimized to support bone marrow cultures for karyotyping and other genetic testing of various hematological disorders.

After an extensive optimization process to create a superior, innovative blend of growth factors, Irvine Scientific's brand new medium CHANG Marrow™ is shown to outperform MarrowMAX™ in clinical studies.

For more information on all our cytogenetic products visit www.irvinesci.com or call 1-800-437-5706.
