

# Introducing

# CHANG Amnio™

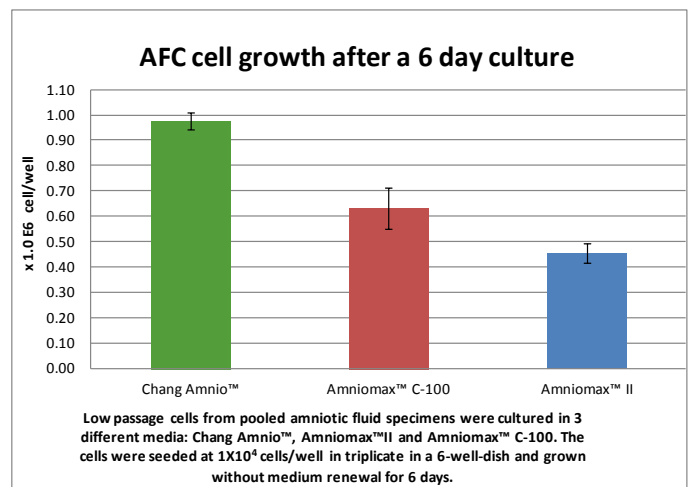

## NEW!

- Higher mitotic index
- Superior chromosomal morphology
- Low days to harvest

CHANG Amnio™ is a complete, ready-to-use medium with an antibiotic developed for the culture of human amniotic fluid cells, chorionic villi sampling, and tissues for use in karyotyping and other antenatal testing.

With an improved blend of basal media and serum, Irvine Scientific's Chang Amnio™ is shown to yield significantly higher growth than other commercially available media.

To evaluate CHANG Amnio™ or for more information on all our cytogenetic products visit [www.irvinesci.com](http://www.irvinesci.com) or call 1-800-437-5706
