FOR IMMEDIATE RELEASE

SANTA ANA, CA - Irvine Scientific[®] Receives European CE Mark for a full range of its Complete (protein supplemented) Human Embryo Culture Media and Andrology products.

Irvine Scientific, a leader in Assisted Reproductive Technologies (ART) announced today that it has received CE mark for a full range of its media designed for ART: Complete P-1[®] Medium with DSS[™], Blastocyst Freeze Media, Blastocyst Thaw Media, Embryo Freeze Media, Embryo Thaw Media, Complete Early Cleavage Medium[®] (ECM[®]) with DSS[™] and Complete MultiBlast Medium[®] with DSS[™], Sperm Washing Medium, Sperm Maintenance Medium w/ HSA, 7% PVP w/ HSA, 10% PVP w/ HSA.

CE mark on ART products demonstrates that the manufacturer's products comply with the relevant European health and safety legislation. CE Marking is widely recognized by regulatory authorities around the world. Irvine Scientific's commitment to quality begins with strict adherence to regulatory guidelines. Irvine Scientific seeks to have regulatory approval for all its products worldwide and the European CE Mark is another step in this direction.

"We at Irvine Scientific are pleased to share this achievement especially with our European customers and network of distributors. We are also proud to be the only US based manufacturer of ART media to have received CE mark on a complete range of our culture media after having undergone extensive review from European Regulatory bodies." said Tim Mullane, Chief Operating Officer, Irvine Scientific.

Irvine Scientific, a subsidiary of Japan Energy Corporation, is a leading manufacturer and supplier of ART products, medical devices, cytogenetics, and a wide range of cell culture media.
