## **Irvine Scientific Named ‘Most Innovative Biotechnology Firm’ by Corporate LiveWire’s 2016 Innovation & Excellence Awards**

**SANTA ANA, California – April 27, 2016:** Irvine Scientific today announced they have been named ‘Most Innovative Biotechnology Firm’ by Corporate LiveWire in their 2016 Innovation & Excellence Awards.

Sponsored by the International Business Innovation Association, The innovation & Excellence awards recognize businesses that have transformed over the past 12 months, setting clear industry trends and advances.

Irvine Scientific leverages over 45 years of experience and knowledge in the innovation, optimization, and manufacture of cell culture media, reagents, and medical devices for research, bioprocessing, cell therapy and clinical applications. From laboratories to large-scale production, and in fields as diverse as the manufacture of biotherapeutic drugs and the growth of embryos after in vitro fertilization, Irvine Scientific’s products and services enable scientists and clinicians to generate sufficient numbers of fully functional, ‘fit-for-purpose’ mammalian cells.

The judging panel at Corporate LiveWire considered the strengths of each shortlisted candidate, choosing the most innovative, groundbreaking and client-focused firms, teams and individuals who have transformed the way in which they do business. Every winner has shown excellence, innovation and strong leadership throughout their various activities over the past calendar year.

The full winners guide can be found at: <http://www.corporatelivewire.com/innovation-and-excellence-awards.html>

**About Irvine Scientific <http://www.irvinesci.com/>**

Irvine Scientific, a member of JX Group, is a worldwide leader in the innovation and manufacture of cell culture media, reagents, and medical devices for researchers and clinicians. The company provides unrivalled service and quality to scientists working in cell therapy and regenerative medicine, assisted reproductive technology and cytogenetics, and industrial cell culture for the large-scale production of biotherapeutics and vaccines. Irvine Scientific adheres to both ISO and FDA regulations and operates dual cGMP manufacturing facilities in California, USA and Tokyo, Japan. The company's consultative philosophy combined with expertise in cell culture and compliance provides customers with unique capabilities and support. For over 40 years, Irvine Scientific has remained uniquely flexible and focused on media while becoming a strategic global leader in media products and services.
